

Handover of keys via safety deposit box

Safety deposit boxes with keys are located on the gate of the guest house and are signed with numbers 1-6, this number is the same as your apartment number.

To receive the keys, you need to know the box number (apartment number) and the four-digit security code. We have either given this information to you or will provide it to you before your arrival.

Select the security code by turning the dials in the top-down order (code 1609 is entered with 1 on top, 9 on bottom).

After entering the code, press the silver rectangular button downwards. The safety box lid can be removed this way.

After removing the lid, the keys for your apartment are in the box.

Please remove the keys. One key is from the gate in the fence as well as the entrance door to the pension, the second key is directly from your apartment.

To replace the box lid, reverse the procedure. Attach the lower part of lid, in the upper part you can help with press of silver rectangular button. A clear click should be heard after contact.

After closing, check that the box is securely closed and set the code to 0000 on the dial. This prevents the unauthorized person from reopening.

If you are unable to close or you do not want to bother with it, please leave the box closure visible in the apartment.

THANK YOU
